

Frequently Asked Questions (FAQ's)

Q. Why should I choose EcoPure Filtrations?

A. EcoPure Filtrations, offers **customized, eco-friendly solutions tailored** to meet your wastewater and water management needs within your budget.

Q. What standards do you follow for treating sewage?

A. We strictly adhere to **local authority Sewage Pollution Board standards**, ensuring compliance with all regulatory requirements and environmental guidelines.

Q. What is the purpose of an STP/ETP?

A. To treat sewage and wastewater to remove contaminants, ensuring safe discharge or reuse. This helps protect the environment, conserve resources, and comply with legal standards.

Q. What makes EcoPure's STP/ETP solutions unique?

A. Our ETPs are designed based on **site-specific factors like effluent characteristics, flow rates, and space constraints**. We ensure optimal performance, regulatory compliance, and long-term efficiency.

Q. What does your revamping service include?

A. We assess your existing STP/ETP system, identify inefficiencies, and integrate advanced technologies to enhance capacity, reliability, and cost-effectiveness, ensuring seamless and sustainable operations.

Q. What does your AMC Contract Cover?

A. It includes monthly checkups of machinery components and dosing chemical levels and Back wash of filters every 6 month

Q. What is the warranty for your systems?

A. We offer **1-year warranty** on all electro-mechanical components, ensuring peace of mind and reliable performance.

Q. Can the treated water be used for drinking?

A. While treated water meets stringent quality standards, it must undergo further purification through **RO (Reverse Osmosis) and UV treatment** to be safe for drinking.

FILTRATIONS

Impure to EcoPure; Redefining Purity

A Unit of 8B Group Pvt. Ltd

Introduction

Imagine a world where every drop of water is treated with the care it deserves, where wastewater no longer pollutes our rivers, lakes, and oceans, but is instead purified for safe reuse. Adopting Sewage Treatment Plants (STP) and Effluent Treatment Plants (ETP) isn't just a smart choice—it's **a responsibility to future generations**. By investing in STP and ETP, you're not only protecting your community but also driving sustainability, promoting hygiene, and contributing to a global solution for water scarcity. **Make the change today for a cleaner tomorrow.**

About Us

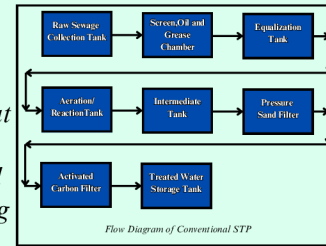

EcoPure Filtrations, a unit of 8B Group Pvt. Ltd., focuses on creating, putting into practice, and sustaining cutting-edge water management technologies. **Effluent Treatment Plants (ETP), Sewage Treatment Plants (STP), Revamping by modernizing outdated systems to improve performance and efficiency, Annual maintenance contracts and water tank sanitation services** are among our areas of expertise.

As part of the 8B Group, we are committed to maintaining the highest standards of environmental responsibility, we are dedicated to providing **creative and sustainable solutions that are suited to the various demands of communities, businesses, and individuals.**

Our Services

• Sewage Treatment Plant

Modern sewage treatment plants from EcoPure Filtrations are made to effectively manage and treat wastewater, guaranteeing adherence to environmental regulations and encouraging sustainability.

Our STPs are designed to satisfy the various requirements of municipalities, residential complexes, and industry.

Conventional Technology

- **SBR (Sequential Batch Reactor):** A proven method that treats wastewater in sequential stages, ensuring reliability and cost-effectiveness.

Advanced Technology

- **MBR (Membrane Bio-Reactor):** Combining biological treatment with membrane filtration, this cutting-edge technology delivers superior water quality and space efficiency.

• Revamping STP/ETP systems

Our specialty at EcoPure Filtrations is converting ineffective sewage and effluent treatment systems into state-of-the-art, highly effective solutions. **Revamping is more than simply an upgrade; it's a reinvention made to fit the needs of the site** and adhere to the most recent environmental regulations.

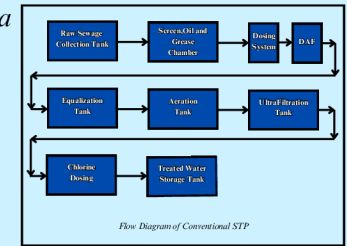

A thorough evaluation of your current system is the first step in our redesign process, which aims to find inefficiencies and obsolete parts. We then **modernize it with cutting-edge technology and well-thought-out designs, increasing capacity, cutting expenses, and guaranteeing dependable, long-lasting operations.**

Our Services

• Effluent Treatment Plant

Industrial effluents require a complex and site-specific strategy to treatment since they are frequently loaded with complex pollutants such organic matter, heavy metals, toxic compounds, and oils.

We at EcoPure Filtrations design and deliver **cutting-edge, specific ETP solutions that are painstakingly adapted to each site's particular needs**. A thorough examination of influent characteristics, site limitations, flow dynamics, and regulatory requirements informs our designs. Every system is intended to enhance performance, seamlessly connect with current infrastructure, and maximize resource efficiency.

• Annual Maintenance Contract (AMC)

AMC ensures your systems run **efficiently year-round, minimizing downtime and preventing costly repairs**. **With regular maintenance**, you extend the lifespan of your equipment, ensure compliance with environmental regulations, and maintain optimal performance. The AMC service includes routine inspections, cleaning, troubleshooting, and prompt support, helping you avoid unexpected failures and costly replacements, while ensuring your **water treatment processes remain seamless and effective.**
